

Gigant baits

★ HIGH QUALITY BOILIES ★

The most freshest ready-made boili on the market! Out now!

THE GUARANTEE OF FRESHNESS = PRESERVATIVE GAS PACKAGING!

This year a new packaging technology raises the catching capability of the **Gigant Baits** boili. The foremost negative feature of a ready-made boili as against the home-made boili baits is the high concentration of added preservative. After a several-year study we have developed a new packaging technology what makes it possible to preserve a ready-made boili longer than ever!

From the year 2009 we are the first on the market to sell preservative gas packed boilies! It keeps the flavour of the bait! The special biological mixture of several gases protects the boilies from oxidation, becoming rancid or from any microbiological infection.

The quality and the freshness are guaranteed utterly until warranty.

No damage on flavour or quality!

Gigamino Boili Product Line

A high amino-acid and extraordinary high vitamin content feature all products in the Gigamono line. This is why they have an incomparable composition of flavours. The amino-acids and vitamins which are mixed into the pasta provide the easy to digest and utilize characteristics of the Gigamino boilies beside the high nutritional value. During fishing the flavour molecules dissolve into the water. These flavours have great bait effects. This is why these products show higher catching capability than other products. Our test angles have proven these products all over Europe. The combinations of flavours are specifically tested for European lakes, fishponds, and reservoirs. The **Gigamino Sushi** has a special mixture of fresh citrus and "frutti di mare" flavour. The **Gigamino One** has a sweet flavour the **Two** has a mixed flavour of fish and fruit, the **Three** has a bit spicy salty meat flavour, and the **Four** has a black pepper cuttlefish flavour. The flavour of essential oils is smoothly harmonized with the vitamins and amino-complexes. And this is the harmony what you can not compare with anything and this is what provides the great bait effect of these products. The package itself has several layers to preserve flavour and to protect against sunlight, has an easy smooth lock. The preservative gas prevents the amino-acids from oxidation and decomposition. This is what guarantees the freshness of all the products during the whole warranty.

GIGAMINO ICE BOILIES

This is the Gigant Baits newest composition. It was developed especially for the chilling, cold waters. Of course, like all the other products of the Gigamino Boili family it is typical of the high protein content, bulky and fishy basis mixture, which is coupled with the high volume of added amino-acid and vitamin contents as well as a spicy flavour in a unique composition. The amino-acids and vitamins which are mixed into the pasta provide the easy to digest and utilize characteristics beside the high nutritional value. However we also stirred further easy dissoluble protein components in the pasta of the Gigamino Ice. From this the surface of the pellet became more disintegrated and soluble, raising more the attention of the fish. The special and unique combination of flavours developed during many years of test fishing results the amazing high baits effect and the catching capability also in the cold waters.

The package of these products has several layers to preserve flavour and to protect against sunlight and has an easy smooth lock. The use of preservative gas prevents the amino-acids from oxidation and decomposition. This is what guarantees the freshness of all the products during the whole warranty period.

Size: Ø 21 mm. Packaging: 1 kg.

GIGAMINO SUSHI BOILIES

This is a premium quality ready-made product with high protein, high volume of added amino-acid and vitamin content. It has an irresistible flavour by the mix of citrus and "frutti di mare". Anglers can use it in cold and warm waters as well from January till the end of December.

The strong flavour of black pepper is harmonized by the flavour of sea fish. This composition of flavours produces the significant baits effect of the product.

Size: Ø16 and 21 mm. Packaging: 1 kg.

THE GIGANT BAITS BOILI PRODUCT LINE

The Gigant Baits boilies have high nutritional value, they are easy to digest and selective baits with classic flavours. These products have been developed specially for catching enormous carps and grass carps. The high bait effectiveness is due to the very high quality ingredients, the excellent nutritional value, and the several special flavours. The following flavours are out now: vanilla, strawberry, honey, tutti-frutti, maple, banana, scopex, fish, mussel, cuttlefish, and Frankfurter sausage. The package of these products has several layers to preserve flavour and to protect against sunlight, has an easy smooth lock. The preservative gas prevents the amino-acids from oxidation and decomposition. This is what guaranties the freshness of all the products during the whole warranty. Size: Ø16 and 21 mm. Packaging: 1 kg and 3 kg.

GIGANT BASIC BOILI FAMILY

Two types of fishy and fruity flavoured boilies belong to this family which can be used exceedingly by the developing of the feeding. There can be found mussel, fish, cuttlefish and crab flavoured boilies in the fishy mixture and there are strawberry, scopex, tutti-frutti, honey and banana flavoured boilies in the fruity mixture. The boilies with the consciously selected flavouring compose a determining basis for both the sweet and the fish like feeding. We highly recommend it for long term, accustoming feeding in a great area! Beside the excellent nutrition value and intensive flavouring it excels with its' favourable price. The package of these products also has several layers to preserve flavour and has an easy smooth lock and it is produced by using preservative gas, what guaranties the freshness of all the products during the whole warranty period. Size: Ø 21 mm . Packaging: 1 kg.

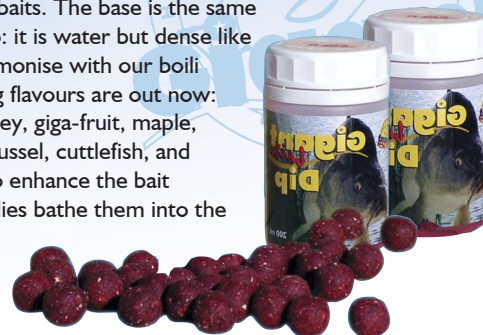

GIGAMINO COMPLEX DIP

The Gigamino Complex Dip product line is more then the classic sop bait. These products are complex liquid mixtures of nutrition. Over the flavours they content bio-active ingredients as well. The base is not the common glycerine but pure and clean water which has been made denser similar to honey by a special plant-origin concentrating material. This provides a more natural base for all the flavours, amino-acids, and vitamins. These products are totally in harmony with our premium boilies. The Gigamino One has sweet-spicy, the Gigamino Two has fish-fruit, the Gigamino Three has spicy meat, the Gigamino four has black-pepper and cuttlefish, and the Gigamino Sushi has citrus-fish flavour. These products are recommended to intensify follow up the baits efficiency of seed baits, and pellets. The Gogamino Complex Dip sticks to the bait surface, partly permeates into the bait and during the fishing it dissolves slowly and permanently its fine flavour. Packaging: 200 ml.

GIGANT BAITS DIP

The Gigant Baits Dip has been developed for to intensify follow up the baits efficiency of seed baits. The base is the same as for the Complex Dip: it is water but dense like honey. The flavour harmonise with our boili products. The following flavours are out now: vanilla, strawberry, honey, giga-fruit, maple, banana, scopex, fish, mussel, cuttlefish, and Frankfurter sausage. To enhance the bait effectiveness of the boilies bathe them into the Gigant Baits Dip a few hours before fishing. Packaging: 200 ml.
